Cd. Victoria, Tamps

### ABOUT ME

I am a Software Development student and an Artificial Intelligence enthusiast, which I am currently studying. I have experience in data cleaning and analysis in various research projects (causal discovery and machine learning). I also have experience leading teams and consider myself proactive, which has helped me stand out in both my work and academic environments. I have participated in entrepreneurship competitions and hackathons.

I have 3 years of experience in web development, mainly with Laravel and Vue.js. I have worked both in a company and independently. I have also worked with JavaScript alone and with design frameworks like Tailwind CSS. Additionally, I have backend development experience with Java and Spring, as well as Golang with Gin.

### EXPERIENCE

#### Software Developer

At Cubos LS, September 2023 - Today

- Design and develop a full-stack application in Laravel
- Maintain legacy software of the company
- Maintain of the server (ubuntu server)
